

UNPACKING COMPLEXITY

THE SOCIAL SCIENCE OF EMERGENCIES, DISASTERS AND RESILIENCE

Jointly hosted by QuakeCoRE New Zealand, Bushfire and Natural Hazards CRC Australia, and Fire and Emergency New Zealand, with support from the Natural Hazards Research Programme and National Science Challenges: RNC respectively, this workshop will operate as a showcase and a discussion of the work being achieved in this space and also where the future lies. By bringing together both researchers and practitioners from across Australia and New Zealand, this collaboration will identify where both the synergy and separation between our two countries lies in both research and utilisation around emergencies, disasters and resilience.

29 MAY 2018

MAC'S FUNCTION CENTRE
Taranaki Street, Wellington
